# Binding Wires

Binding Wires are used for the purpose of tying applications in the field of construction. The rebars are tied at the joints to keep the structure intact. These are also called annealed wires and are made of mild quality steel. This adds properties like flexibility and softness, required in its main use.

Our Binding Wire is available in sizes ranging from 0.8mm to 1.6mm. We also manufacture GI Binding Wires of 1.2mm. We use HDPE packaging with Sachi Wires print which is tamper-proof and moisture resistant. Our net Packing weight is of 30/80 Kg per bundle.

*At Sachi Wires we manufacture all Binding Wires as per IS CODE 280*

## Key Features of Sachi Binding Wires

- ◆ Consistent Diameter
- ◆ Ductility, Strength and Consistency
- ◆ Ease of tying to the users
- ◆ Raw materials used as per IS 7887
- ◆ Binding Wire of IS 280 with annealed finishing

## Advantages of Sachi Binding Wires

## Sizes

Sachi Wires offers Binding Wires from 0.8mm to 1.6mm.

## How you save

Sachi Wires offers more length compared to local wires. By buying Sachi Wires you reduce on construction cost.

Sachi Wire				Saving Compared to local wire	Local Wire
